Program Purpose:
To provide practitioners with basic knowledge of basic arrhythmia and 12 lead ECG interpretation.

Target Audience:
Licensed Nurses, APRNs, Physician Assistants & Respiratory Therapists

Program Objectives:
At the conclusion of this program, the participant should be able to:
- Identify cardiac anatomy and physiology
- Describe cardiac electrophysiology and ECG waveforms
- Discuss conduction properties and pathways
- Identify normal and abnormal rhythms
- Describe QT interval monitoring and QT prolongation clinical implications
- Describe clinical and pharmacological management of abnormal rhythms
- Identify correct lead selection and placement
- Describe proper monitoring and troubleshooting
- Describe normal 12 Lead ECG
- Identify abnormal 12 lead ECG representing STEMI

Program Instructor: Dr. John Paguntalan, PhD APRN CCRN-K, is a nurse practitioner and has more than 15 years of critical care experience. He first received his CCRN in 1999 and his CCRN-K in February 2017. He completed his Ph.D. in nursing from the Medical University of South Carolina in 2015. A published author of peer-reviewed articles, he uses clinical language that makes complex concepts easy to understand and real-life clinical experiences that audience can relate to. A member of the Society of Critical Care Medicine and American Association of Critical Care Nurses, he was named Outstanding Educator of the Year in 2015 by Upstate AHEC Educational Consortium.

Program Fee:
- $0 for Upstate AHEC Members
- $150 for Non-Members
