Assessment, planning, implementation, and evaluation of all bodily systems, as well as treatment of selected emergencies will be covered, as guided by the ENA Core Curriculum. Test-taking skills and sample questions will be presented. For more information on the CEN exam, please go to www.bcencertifications.org.

At the conclusion of this program, each participant will be able to:

- Assess and provide emergency nursing care to the patient with neurological emergencies.
- Describe the anatomy and physiology of the cardiac system and assess and provide emergency nursing care to the patient with cardiac emergencies.
- Assess and provide emergency nursing care to the patient with pulmonary emergencies.
- Assess and provide emergency nursing care to the patient with orthopedic/wound emergencies.
- Discuss professional issues and legal implications of various emergencies.
- Assess and provide emergency nursing care to the patient with general medical emergencies.
- Assess and provide emergency nursing care to the patient with multi-system trauma and/or shock.
- Assess and provide emergency nursing care of the patient with GI emergencies.
- Assess and provide emergency nursing care of the patient with a GU/GYN/OB emergency.
- List concepts of emergency nursing care to the patient with substance abuse, toxicological, psychosocial, or general environmental emergencies.
