INSTRUCTOR

Elizabeth Harvey, DPT is a physical therapist specializing in treatment of patients with complex neurological and orthopedic involvement. She has over 17 years experience in early intervention, outpatient orthopedics, school-based and sub-acute rehabilitation settings. She is a Kinesio® Tape Instructor and has been using tape for over 11 years. She is also Pediatric NDT and MNRI trained. She has worked with medically complex populations which has led to research and curriculum development, such as co-author of the PaSS Method® (Posture and Sensory Stimulation) and Sensory Point Tapings. She is an Educator of Infant Massage and certified in Trismus Treatment. She has been a presenter at both state and international levels. Elizabeth earned a Bachelor of Science in Biology from Newberry College, a Master of Rehabilitation Science from the Medical University of South Carolina, and a Doctor of Physical Therapy from AT Still University. She is the owner of ABC Therapies, LLC.

COURSE DESCRIPTION

(Pre-requisite, completion of KTA approved KT1, KT2, and KT3 courses)
The KT4 Neurological course builds on and expands techniques learned in the KT1, KT2, and KT3 courses. This course addresses variations in nervous system status. The attendees will develop treatment strategies and practice extensive Kinesio Taping techniques to address a wide variety of issues encountered when treating patients with neurological diseases. Some examples include: CVA, CP, ALS, MD, MS, and TBI. The course considers other physiological systems which impact patient considerations when working with the trunk and extremities. Developing, recovering, and deteriorating nervous system patients are investigated, strategies planned, and Kinesio Taping techniques practiced.

Specialty Neurological Concepts of the Kinesio Taping Method: Influencing the Adult Nervous System

**** Participants should dress in layers (wear shorts and tank top for demonstrations and practice). Participants should also bring a yoga mat and scissors.**

COURSE OBJECTIVES

- Classify three Nervous System Status types and Expectations for therapeutic intervention.
- Develop treatment strategies, based on CNS status, utilizing Kinesio Taping applications to obtain desired results.
- Practice specific, advanced, Kinesio Taping applications, including the EDF technique to the trunk and extremities after CNS status is determined.
- Understand sequential progression of Kinesio Taping techniques when treating adult neurological patients.
- Differentiate the rationale for Kinesio Taping applications used with adult neurological patients versus other patient types.
- Develop successful, rationale-based strategies to treat the deteriorating nervous system patient.
